

ONE NUTRITION AUSTRALASIA SYMPOSIA FEED & INGREDIENTS PROGRAM STREAM

Instructions to Authors of Expression of Interest

The **One Nutrition Australasia Symposia (ONA)**, in conjunction with **Recent Advances in Animal Nutrition (RAAN-A)** and **Australasian Equine Science Society (AESS)**, is being held at Pullman East Melbourne, 18-20 May 2027, and is a major initiative of FIAAA and SFMCA. The overarching title of the conference has rebranded from Advancing Milling and Nutrition in 2025 to One Nutrition Australasia Symposia to be more inclusive of all partners. Following the success of the first event the biennial conference will also be expanding across three-days to cover even more content. In 2025 AMN showcased over 100 speakers in two days across 4 program streams, to over 330 delegates and was a resounding success.

The feed and ingredient program stream within ONA will still be known as Advancing Milling & Nutrition, or AMN for short. AMN is a technically focused forum for feed, ingredients and nutritionists to advance knowledge in all aspects of milling, animal nutrition and the associated supply chains. The unity of multiple events under the one roof provides delegates the opportunity to move between sessions depending on their interests, whilst sponsors are exposed to delegates of all streams meaning increased exposure at no extra cost.

Please be advised that ATMA will sadly not be hosting a flour program at ONA2027. The milling stream will be feed milling and ingredient focused.

We are pleased to invite you to submit technical submissions for consideration.

The submission process is a two-step process.

Step 1 – The first step is an expression of interest which is a summary of your topic detailing why it is of interest, with enough information to assist the program committee in assessing the paper's value to the conference. The expression of interest should be approximately 300 words. Inclusion of graphs and images in your submission is encouraged. Please note that all expressions of interest are to be submitted online via the website link only.

Acceptance will be at the discretion of the program committee based upon the relevance to the session themes.

Step 2 – If accepted by the program committee for presentation you will be expected to submit a short technical paper of up to 600 words according to the guidelines on the website and due by 1 February 2027.

All presentations at the conference must be editorial and not advertorial. Speakers will be introduced by name and company however the presentations will be on the conference template which excludes company logos and branding.

Potential sessions themes include, but are not limited to:

- Challenges & Opportunities
- Fibre
- Raw material assessment
- Formulating using AI
- Process & Nutritional Outcomes
- Ingredient Management & Quality
- Innovation & Technology
- Operational Management & Decision Making

Examples of topics for submissions could include:

- New ingredients / feedstuffs for people / animals
- Improvements in processing of ingredients to improve animal performance
- Innovations in use of biomarkers for measuring nutritional stress and immune competency
- Process innovation and optimisation in flour mills
- Innovative end-products of flour or transitioning from flour to end-products.
- Antimicrobial stewardship
- Gut microbiome and interaction with brain activity.
- Heat stress in animals
- Forever chemicals and how they impact agriculture
- Methane reduction
- Impact of sampling variability – test results correlating with inputs.

The closing date for expressions of interest will be **14th October 2026**.

If successful you will be advised by **14th November 2026**.

If accepted onto the program, a full page paper will be required by **1st February 2027**

Upon receipt of your expression of interest, the Conference Manager (KAM Events) will issue an email confirmation to the submitting author. If you do not receive a confirmation email from the abstract system within 48 hours please contact onenutrition@kamevents.com.au. All abstracts will be reviewed by the program committee, and you will be notified of your submission outcome via email no later than 14th November 2026. Instructions will be provided on the notification email. It is a requirement that all presenters must register and pay for a full or day registration.
